**Subject:** RE: Tank Information

I did a little investigating and I believe that she recently excepted an early retirement. I have no idea who took her place. I will need to make some calls and find out who took her place. I am on travel this week so it may take me a few days figure out the right person to contact. I will try and send some emails out tonight to see if somebody else can track that information down for you sooner.

Sorry for the inconvenience.

-Mark

Mark

The number for Barbrea is disconnected

Thanks

Steve

**Subject:** Tank Information

Steve,

For more information regarding installing and above ground tank you can contact Barbara Carr. She can be reached at (312) 886-7187. You may also want to talk to Scott Hansen from the Mille Lacs Band DNR. He can be reached at (320) 532-7445.

As far as the tank removal, if you are using a Minnesota Certified contractor you are on the right track. You will need to assess the site to ensure that the tank has not leaked. At a minimum we would like a site diagram and the locations of where the samples were taken and the results. You will also need to send us a copy notification form indicating that the tanks were removed, a copy of the State's notification will be sufficient. If possible we would like to have Scott observe the removal.

I will have to get back if we need more information. If you have any additional questions please feel free to contact me.

Thanks.
